PROFESSIONAL SUMMARY

Ethereum Blockchain Developer with hands-on experience in building and deploying secure, gas-efficient smart contracts using Solidity, Hardhat, and Truffle. Skilled in creating full-stack decentralized applications with React, Web3.js, and MetaMask integration. Proficient in EVM, ERC-20/721 standards, IPFS, and DeFi protocols. Familiar with contract testing and smart contract auditing practices. Open to remote blockchain developer roles and internships.

EDUCATION

Vellore Institute of Technology

Bachelor of Technology in Computer Science and Engineering

Expected Graduation: **2026**

RELEVANT COURSE WORK

Data Structures & Algorithms (C++), DBMS ,Object Oriented Programming , Software Engineering, Operating Systems, Software Engineering, Internet & Web Programming, Computer Networks, Theory Of computation ,

TECHNICAL SKILLS

- **Blockchain Technologies:** Solidity, Web3.js, Truffle, Smart-Contracts, Alchemy
- **Ethererum** : Token Standards (ERC-20, ERC-721), Gas Optimization IPFS
- **Front-End:** React.js, JavaScript, HTML5, CSS3
- **Backend:** Node.js, MongoDB ,Postman ,Heroku,
- **Programming Languages:** C++, Python, JavaScript ,SQL
- **Tools:** Ganache, Remix IDE, Git, GitHub

EXPERIENCE

Pay Me Fintech Solutions | Frontend Developer Intern (June - July 2024)

Built responsive and user-friendly interfaces using React.js.

Assisted in smart contract development and Web3 integration, enhancing DApp functionality.

Collaborated remotely using GitHub and Agile tools, improving team productivity.

PROJECTS

Fund Hive: - <https://crowdfundhive.netlify.app/>

- Built a decentralized crowdfunding platform using React, Vite, Tailwind CSS, and Solidity smart contracts
- enabling creators to launch campaigns and backers to contribute securely via crypto wallets
- Test-net deployment
- ensuring trust through blockchain-powered transparency

Decentralized E-Voting System - [GitHub](#) (Nov 2023 - Jan 2024)

- Built a blockchain-powered voting platform ensuring secure, transparent, and immutable elections.
- Integrated a token-based mechanism for unique voter identification and transaction validation.

Event Management Smart Contract - [GitHub](#) (June - June 2024)

- Designed and deployed a Solidity-based smart contract to streamline event ticketing and manage agreements between organizers and sponsors.
- Ensured secure and transparent operations using blockchain technology.

Lottery smart contract - [GitHub](#) (Sept - July 2024)

- Developed a decentralized lottery system with automated prize distribution using Solidity
- integrating randomization for fairness and transparency

CERTIFICATIONS

- **Cloud computing – NPTEL** (2023 - 2024)
